# CATALIS WEBSITE MANAGEMENT

*Developed to meet the specific needs of a local government*

Our CMS provides you with the ability to refine all user accounts to restrict access to specific features. For example, you can create an admin user account and provide a specific user with access to edit only specific pages or have access to a specific application. This is a great feature for a larger government that may want to provide departments with access to edit specific sections of a website.

There is no limit to the number of user accounts, and you can enable/disable user accounts at any time. Catalis' CMS is also responsive for any mobile device, and you can edit any pages and use any admin features from a mobile phone, tablet, or computer.

**In addition to our standard dashboard and Single-Sign-On (SSO) portal, some key benefits to using Catalis' CMS Package include:**

## **Accessibility**

Accessibility Development, SSL Certificates, and North American hosting (AWS).

## **Strong Security**

Scan files and behaviour with monitoring and anti-virus software. We have annual penetration tests, and a security committee implementing and updating best practices.

## **Mobile Responsive Design**

This proposal includes a design that will be completely responsive on any mobile device. Your content management system is also responsive and provides you with the ability to edit your website on any mobile device including a smartphone.

## **Business Directory**

Map business locations.

## **Accordions**

The Accordion is a new data type within the CMS. It is like the Quick List data type, but each item is grouped in an expandable/collapsible region.

## **Air Quality**

Display air quality information on your website.

## **Notices/News**

The News content type is best for content you want to be scheduled for publication. This content type is also useful for creating a section of announcements that you can easily promote to the homepage using the Promotions feature. The News content type is sorted by publish date.

## **Documents**

Centralized file management where videos can be managed.

## **Cards**

Display the content of your items on a page either horizontally or vertically, and as properly fit in any screen size. Click on Add Item to add a new Box.

## **Calendar**

Enter community activities, which can be displayed as a list of events or in a calendar. With the Events content type, you can control when the event should automatically roll off the live site. This helps keep your site free from outdated content.

## **Intranet**

Create password-protected pages.

## **Maps**

List a series of addresses for tourism, park locations, and land available for development. To add a new location, click on Add Item.

## **Navigation Banner**

Add a hero image or opening photo.

## **Meetings**

Feature your local government's meeting minutes and agendas on your community's website. You simply upload the documents directly to the website and they will be categorized and displayed by date and meeting type.

## Image Gallery

Create an online photo album to post several images and control their order and captions. The images appear as thumbnails, and any image can be enlarged simply by clicking on it.

## Alert Banner (Alerts)

Manage alert messages that will appear as a banner to alert people to important information. This is a convenient tool to highlight people's attention to important matters such as service outages.

## Postings

Display details regarding job openings. It gives you the option of formatting your text in a standard flow or developing your own format by entering all the relevant information into the "Comments" text box.

## Dashboard

View and share information about traffic and engagement using Google Analytics 4, dedicated sections for meetings, events, form submissions, and open orders.

## Weather

Display weather information on your website.

## RSS Subscribe

Display local news and news from multiple news sources. You control the feeds and the news automatically appears on your website.

## Advance Admin Access Rights

Create unlimited access accounts for users to log in and update the website. Each user will have their own username and password and the website will track who last made certain edits. Each user will also have permissions set so they can only edit certain pages within the website. Our solution also provides group management.

## Polls

Allow visitors to answer a question on any topic. More than one question can be entered at a time, but each question is treated individually. Add a new Item for each question in the poll.

## Promotions

Display the information from one section to another. An example would be taking an events section and placing the information on the home page in the form of a calendar without having to retype any information.

## Forms

Create your web forms. Along with the ability to design your forms, you can also edit the confirmation pages and emails for any form submissions. There is no limit to the number of forms you create and manage on your website.

## Milestones

The Milestone type is another new data type in the CMS. Milestones were inspired by looking into examples of accordions. The imagery is designed to represent a timeline of events.

## Social Media Icons

Create manageable links to your community's Facebook, Twitter, YouTube Instagram, LinkedIn, or Nextdoor accounts.

## People Directory

Display the personnel in your community.

## Lists

Display information on a page with index links at the top of the page. This is often used when creating a frequently asked questions section, links page, or department forms.

## Website Search

Provide visitors the opportunity to locate specific information, including documents, on your site.
